

Modern detached house on a quiet link between forest and residential area

The house, built in 2007, was completely renovated in 2014/2015 and 2023/2024, with all wiring, pipes and radiators being renewed or replaced, with the exception of the exterior windows, which were replaced in 2018/2019 with burglar-resistant, self-venting, integrated and remote-controlled windows from Ketzbeck. The exterior plaster was more than doubled in 2024, the exterior paving of the currently concreted walkways will be adapted to the individual wishes of the winner.

The house consists of a basement, a ground floor and an upper floor with a living space of 125 m² per floor, as each floor has been designed accordingly. The basement has direct access from the outside, a fitness room, a games room, an office, a bathroom with WC and currently two storage rooms. One of the storage rooms is intended for a future kitchen. The laundry room is located on this level in the same airspace as the house's heating system, which is powered by district heating but is also prepared for pellet heating and solar hot water.

This and the other floors are equipped with radiators that are suitable for heating with solar energy or renewable energies.

The ground floor has a main entrance and side entrances from the kitchen terrace and the living room terrace. On the ground floor there is a bedroom, a bathroom with WC, a separate WC and a large living room with kitchen. The double garage with automatic door and direct access from the house is also located on this level. The covered kitchen terrace is 20 m² and the uncovered terrace of the living room is 40 m².

Upstairs there are four bedrooms, two bathrooms, one with bath and WC, the other with shower and WC, and a covered balcony of 60 m².

The roof is covered with red tiles and has wooden beams that extend over the balcony below. On the balcony, a hot tub and an electric sauna were prepared during the renovation in 2015.

The garden is 1071 m² in size (plot 1230 m²) and has a large children's playground. There is a double cistern in the garden where rainwater is collected.

The building has a floor area of 159 m² and a total usable area of 411 m² with a terrace and a balcony.

The primary school and kindergarten are a 2-minute walk away, the bus stop with the bus line to the nearest town is a 3-5-minute walk and the railway station is a 10-minute walk. The Ilz/Fürstenfeld motorway exit on the A2 is 9 km away, the nearest town with a grammar school and secondary school with a well-developed infrastructure is 6 km away.
