

Modern detached house on a quiet link between forest and residential area

The house, built in 2007, was completely renovated in 2014/2015 and 2023/2024, with all wiring, pipes and radiators being renewed or replaced, with the exception of the exterior windows, which were replaced in 2018/2019 with burglar-resistant, self-venting, integrated and remote-controlled windows from Ketzbeck. The exterior plaster was more than doubled in 2024, the exterior paving of the currently concreted walkways will be adapted to the individual wishes of the winner.

The house consists of a basement, a ground floor and an upper floor with a living space of 125 m<sup>2</sup> per floor, as each floor has been designed accordingly. The basement has direct access from the outside, a fitness room, a games room, an office, a bathroom with WC and currently two storage rooms. One of the storage rooms is intended for a future kitchen. The laundry room is located on this level in the same airspace as the house's heating system, which is powered by district heating but is also prepared for pellet heating and solar hot water.

This and the other floors are equipped with radiators that are suitable for heating with solar energy or renewable energies.

The ground floor has a main entrance and side entrances from the kitchen terrace and the living room terrace. On the ground floor there is a bedroom, a bathroom with WC, a separate WC and a large living room with kitchen. The double garage with automatic door and direct access from the house is also located on this level. The covered kitchen terrace is 20 m<sup>2</sup> and the uncovered terrace of the living room is 40 m<sup>2</sup>.

Upstairs there are four bedrooms, two bathrooms, one with bath and WC, the other with shower and WC, and a covered balcony of 60 m<sup>2</sup>.

The roof is covered with red tiles and has wooden beams that extend over the balcony below. On the balcony, a hot tub and an electric sauna were prepared during the renovation in 2015.

The garden is 1071 m<sup>2</sup> in size (plot 1230 m<sup>2</sup>) and has a large children's playground. There is a double cistern in the garden where rainwater is collected.

The building has a floor area of 159 m<sup>2</sup> and a total usable area of 411 m<sup>2</sup> with a terrace and a balcony.

The primary school and kindergarten are a 2-minute walk away, the bus stop with the bus line to the nearest town is a 3-5-minute walk and the railway station is a 10-minute walk. The Ilz/Fürstenfeld motorway exit on the A2 is 9 km away, the nearest town with a grammar school and secondary school with a well-developed infrastructure is 6 km away.

## Information

The municipality of Söchau looks back on a long history as a holiday resort. More recently, the idyllic and peaceful village has successfully positioned itself as a herb village. The well-kept tourist resort in the heart of the Styrian thermal spa region offers holidaymakers and guests a floral world of experience with show gardens ranging from vines and roses to herbs. Expansion into a unique garden of the senses and visions is currently being planned. The tourist infrastructure has also developed along with the feel-good community, two hotels offer ideal seminar and conference conditions, and small and medium-sized businesses have also come to appreciate the municipality of Söchau as a business location. The municipality is on hand to help new businesses - whether commercial or residential - to settle here, utilising subsidies and providing unbureaucratic administrative support. Developed building plots and commercial sites are available. Very well-developed provincial roads provide quick access to the international traffic arteries of the A2 south motorway and, in future, the S7 motorway.

This is a sunny location on the edge of the village in the municipality of Söchau. Söchau has a food market, a bank, a bakery with a café and much more.

The thermal spa capital of Fürstenfeld, just 8 km away, also offers an excellent infrastructure with numerous shops, kindergartens, schools and a grammar school, pharmacies, doctors, restaurants and bars etc.

The Loipersdorf-Fürstenfeld thermal spa golf course, a 27-hole championship course, is only 13 minutes away by car. The Bad Loipersdorf thermal spa resort is just 15 minutes away and offers wellness facilities and a unique local recreation area with wonderful hiking and cycling trails.

Its proximity to the A2 Ilz highway means that Graz and Vienna are also easily accessible.

### **“Excellent place to live in Eastern Styria**

An excellent place to live in Eastern Styria offers an excellent range of amenities and outstanding service as a residential and family community and fulfils the demanding criteria of the Eastern Styria Living Region Quality Association.”
