Hi everyone, hope you and your family are well.

The pictures section is not perfect yet, I can only upload three photos to the "Inside" section. The "Outside" section doesn't allow any.

I have compressed all my photos to less than 5 Mb.

If you are working on this now, please take my request as irrelevant.

However, please let me know if it works, so I don't have to do all the trial and error to see if it works or not.

Best Regards

Csaba

On the attached page "User Dashboard - The House - Download" in the "Download" section I can't download anything, even though I have uploaded the documents that could be downloaded from here several times on fiver, they were uploaded here even when I placed the order. Please upload the documents below to the "download" sections numbered in the attached photo and display them in the same way as the documents on the "Expose" page:

- 1. - House Floor Plan
- 2. - House Expose
- 3. - 4K Images
- 4. - Energy Certificate
- 5. - Land Register
- 6. - Smart Home
- 7. - Legal Information

Please replace caption 3 with "4K Images" instead of "bank valuation."

I also note that today I received no replies and no deadlines.

Good night.
Best Regards
Csaba

Hello petronellakocsl,

I hope you and your families are doing well.

As per our last meeting discussion, I am working on the issues you provided me. I hope I can give you the update within 24 hours.

Note: I've added the s-tr-i-p-e-Pa-y-P-a-l, Google Analytics, and Hotjar. Currently, we have added the "Weglot" API it's on the way to live. On the other hand, I discussed the "Billbee" API in our previous meeting discussion. It would be great for me if you could clarify which "endpoint" exactly you need in this "Billbee" API. Also, in your document you mention "Intercom" and "Zendesk" both provide the same service. So it will be great if we discuss more about it. We can arrange a short meeting where we can discuss our project. I am available from 9:00 AM to 5:00 PM (GMT +6).

Please let me know if there are any further adjustments or additions needed.

Best Regards,
Akib

Hi everyone, hope you and your family are well.

Zendesk I don't need it.

Intercom I need as a chat provider, but not FIN AI yet, only the normal chat bot from the platform.

Billbee "endpoint" I check it now, and I come back in an hour about.

Now I'm just waiting to see when the "Shop" page will appear between the main "How It Works" and "The House" pages.

And how I can do a "pay one ticket and get two" promotion.

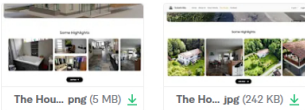

And the action banner, where I can display the action with fixed text, banner image. (It doesn't have to move blink, and I would ask for the top of the "Home", "About US", "How It Works", "The Shop", "The House" pages somewhere where it looks good. What's important is that you give me the size of the "Banner" for the graphics that fit it, so I can make one that fits there.)
We talked about these in the zoom chat, and I've been writing them for weeks.

A design question, when did the bottom of The House page change. I don't want to change the pictures

there now or later. If you can put the "old version" back, because it doesn't look good to see the same photos at the top as at the bottom. This can be fixed here with the older pictures, I have attached screenshots of them.

Best Regards
Csaba

I deactivated the two-factor authentication in the Billbee program, so you can log in (https://app.billbee.io/app_v2/sign-in?hinttext=Erfolgreich%20abgemeldet), there are not so many API options here (https://app.billbee.io/app_v2/settings/api/general). This program does the billing, and it will automatically send the eBook with the invoice.

Since we didn't talk about how your site could do this, but if it can do this, it's not absolutely necessary for this function.

Here I can add things to post to the account and track which program the money is going through (PayPal, Stripe, or direct deposit to bank account)

Feel free to switch the language to English if you can.
